WORK EXPERIENCE

Vertafore

Sep. 2023 – Present

Software Engineer II

New York, NY

- Designed and developed a secure data access API in C#/.NET, applying REST service architecture and error handling patterns to reduce accumulated technical debt; debugged across service and data layers in preparation for enterprise client integration.
 - **Stack:** C# / .NET; EF Core; SQL Server; REST APIs; Azure DevOps
- Established unit test coverage standards for the data access API, authored 75+ unit tests using TDD, and drove adoption of testing practices across a 5-person engineering team.
- Identified and scoped technical debt across a 108-project legacy .NET monolith (2003+ codebase) serving 70+ enterprise clients including GEICO and Allstate; refactored 15 projects to accelerate feature delivery and improve maintainability.
- Conducted bidirectional code reviews via Azure DevOps, participated in Agile/Scrum ceremonies, and integrated AI-assisted development tooling (GitHub Copilot) into the team workflow.
- Architected an AI-enabled data agent using MCP Server integration for internal testing and analytics during the Vertafore 2025 AI Immersion Week Hackathon (Nov. 2025).

Publicis Sapient

Jul. 2022 – Sep. 2023

Software Engineer

Denver, CO

- Developed and maintained full-stack web applications on the Salesforce Lightning platform for a 5-person engineering team, debugging across frontend, backend, and data layers to enable project finance tracking and visualization.
- Implemented Salesforce Lightning UI components in JavaScript for project finance dashboards and data visualization, contributing to the user-facing layer of the platform.
- Optimized SQL data pipelines for enterprise clients, reducing average query time by ~10% and enabling real-time cross-team reporting.

CFM, Inc.

Oct. 2021 – May 2022

Software Engineer Intern

Tempe, AZ

- Built automated test frameworks achieving 80% coverage and enabling weekly releases for financial institution clients; conducted on-site QA and regulatory compliance testing of custom firmware on banking hardware.

EDUCATION

Arizona State University

May 2022

BS, Computer Science

Tempe, AZ

- **GPA:** 3.4 / 4.0

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** Salesforce Certified Platform Developer I (Sep. 2022); Salesforce Certified JavaScript Developer (Apr. 2023)
- **Technologies:** JavaScript; TypeScript; React; Node.js; C# / .NET; Java; Python; REST APIs; MySQL; SQL Server; EF Core; Azure DevOps; Docker; Git
- **Skills:** TDD; Agile/Scrum; MCP Server Integration; AI-assisted development (GitHub Copilot)
